Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was a syringe with a needle shield have an inner cap with a double pointed needle that is located on a needle seat in the inner cap and a washer that is located between the inner cap and the hollow body of the syringe, wherein the washer has a membrane that prevents fluid transfer until the syringe is ready to be used. The needle shield also contains an outer cap connected to a clamp ring by a breakable web, which allows the user to place the outer cap over the needle and inner cap and then break the web when the device is ready to be used.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

Please see the appeal brief dated 1/10/07 for convincing arguments over Brunel (USPN 6,186,980). One limitation that was not found in Brunel, was the limitation of a washer with a membrane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
